

OpenClaw: **Your 24/7** **AI** **Assistant**

310K+ GitHub stars. 50+ integrations.
Runs **locally on your machine.**
OpenClaw is the open-source AI
agent that actually **does things for**
you. This is Part 1 of a 4-part series.

What is OpenClaw?

- Open-source AI agent (Node.js)
- Connects to Claude, GPT, DeepSeek
- Works via WhatsApp, Telegram, Slack, Discord
- Runs locally - your data stays with you
- Plans and executes multi-step tasks autonomously

Before vs **After** OpenClaw

BEFORE

- ✗ Manually triaging 50+ emails daily
- ✗ Copy-pasting between 10 tools
- ✗ Forgetting follow-ups and deadlines
- ✗ Spending hours on repetitive tasks

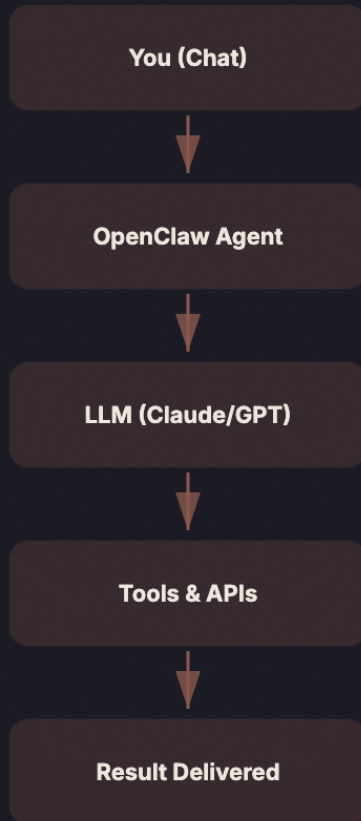

AFTER

- ✓ AI triages and drafts email replies
- ✓ One agent coordinates all your tools
- ✓ Automated reminders and summaries
- ✓ Hours reclaimed every single week

Why Developers **Love** It

- 01** Open source - full control, no vendor lock-in
- 02** 50+ messaging integrations out of the box
- 03** Agentic - it plans, decides, and executes
- 04** Runs locally - privacy first, always
- 05** Fastest growing OSS repo in history

How OpenClaw Works

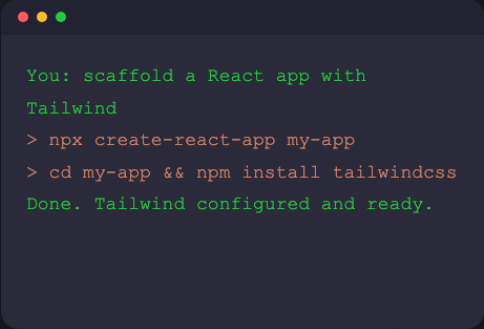

It Actually **Does** Things

Tell it to scaffold a React app.

It runs the commands.

Tell it to debug your code.

It reads, fixes, and commits.

```
You: scaffold a React app with  
Tailwind  
> npx create-react-app my-app  
> cd my-app && npm install tailwindcss  
Done. Tailwind configured and ready.
```

**OpenClaw doesn't just answer
questions. It takes action.
That's the difference between a
chatbot and an AI agent.**

Who Is This For?

- Developers automating repetitive workflows
- Solo founders wearing 10 hats
- Freelancers managing clients and projects
- Anyone who wants a personal AI operator
