

OpenClaw Features That Actually Matter

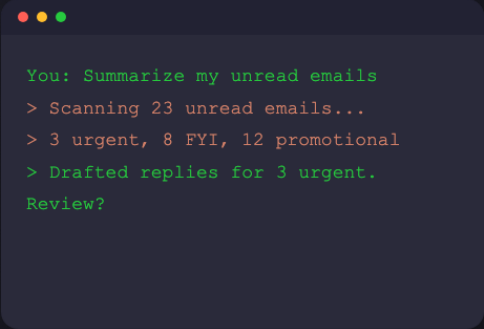

Part 3 of the **OpenClaw series. Setup is done. Now let's explore the features that make OpenClaw a **productivity machine**.**

The Agent Loop

Email Autopilot

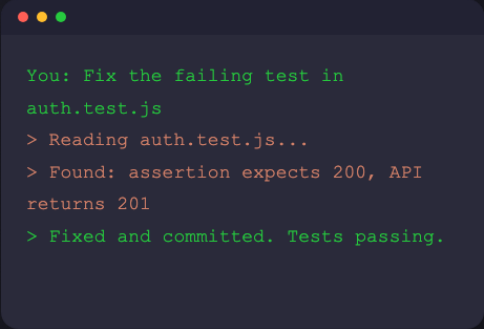

OpenClaw triages your inbox.
Drafts replies. Flags urgent items.
Sends you a daily summary.

A terminal window with a dark background and three colored window control buttons (red, yellow, green) in the top-left corner. The text inside is green and shows a conversation about summarizing unread emails.

```
You: Summarize my unread emails  
> Scanning 23 unread emails...  
> 3 urgent, 8 FYI, 12 promotional  
> Drafted replies for 3 urgent.  
Review?
```

Code Automation

Scaffold projects. Debug code.
Run tests. Push to GitHub.
All from your chat app.

```
You: Fix the failing test in  
auth.test.js  
> Reading auth.test.js...  
> Found: assertion expects 200, API  
returns 201  
> Fixed and committed. Tests passing.
```

50+ Integrations

- 01 WhatsApp, Telegram, Slack, Discord, Signal
- 02 Gmail, Google Calendar, Notion
- 03 GitHub, GitLab for code workflows
- 04 Custom webhooks and cron jobs
- 05 Any API via custom skills

Single Agent vs Multi-Agent

BEFORE

- ✗ One agent handles everything
- ✗ Gets confused with complex tasks
- ✗ No specialization
- ✗ Errors compound across workflows

AFTER

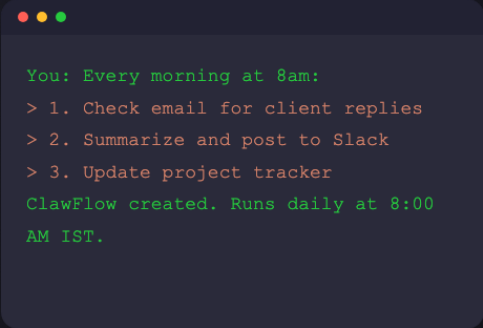

- ✓ Specialized agents per domain
- ✓ Email agent, code agent, research agent
- ✓ Each focused on its narrow task
- ✓ Fewer errors, better results

ClawFlows: Chain Skills

Build multi-step automated pipelines.

Trigger on schedule or webhook.

No code required.

A terminal window with a dark background and three colored window control buttons (red, yellow, green) in the top-left corner. The text inside is as follows:

```
You: Every morning at 8am:  
> 1. Check email for client replies  
> 2. Summarize and post to Slack  
> 3. Update project tracker  
ClawFlow created. Runs daily at 8:00  
AM IST.
```

Key Takeaway

- OpenClaw is not just a chatbot
- It's an operating system for AI agents
- 50+ integrations, multi-agent support
- Automate the boring stuff, focus on what matters
