

OpenClaw: Power User Mode

Part 4. The **final part. You've set it up. You know the features. Now let's unlock the **advanced** workflows that separate casual users from power users.**

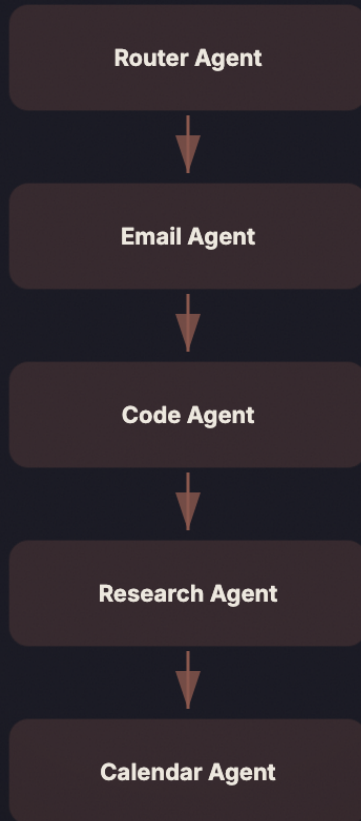

Tip 1: VPS Deployment

Move OpenClaw off your laptop.
Deploy to a \$5/month VPS.
Now it runs 24/7, even when you sleep.

A terminal window with a dark background and three colored window control buttons (red, yellow, green) in the top-left corner. It displays a series of commands and their output in a monospaced font.

```
$ ssh my-vps
$ docker pull openclaw/openclaw:latest
$ docker compose up -d
OpenClaw running 24/7 on your VPS.
```

Multi-Agent Architecture

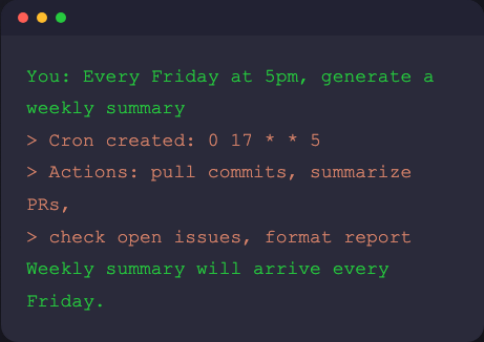

Top 5 Skills to Install

- 01 Capability Evolver - agents that improve themselves
- 02 ClawFlows - multi-step workflow orchestrator
- 03 GitHub Integration - code review and PR automation
- 04 Web Researcher - deep research with citations
- 05 Daily Digest - automated morning briefings

Tip 2: Cron Jobs

Schedule recurring tasks.
Daily standup summaries.
Weekly report generation.
All automated.

A terminal window with a dark background and three colored window control buttons (red, yellow, green) in the top-left corner. The text inside the terminal is as follows:

```
You: Every Friday at 5pm, generate a  
weekly summary  
> Cron created: 0 17 * * 5  
> Actions: pull commits, summarize  
PRs,  
> check open issues, format report  
Weekly summary will arrive every  
Friday.
```

```
You: Every Friday at 5pm, generate a  
weekly summary  
> Cron created: 0 17 * * 5  
> Actions: pull commits, summarize  
PRs,  
> check open issues, format report  
Weekly summary will arrive every  
Friday.
```

Beginner vs Power User

BEFORE

- ✗ Single agent, single channel
- ✗ Manual triggers only
- ✗ Running on laptop
- ✗ Default LLM settings

AFTER

- ✓ Multi-agent specialized setup
- ✓ Cron jobs + webhooks + event triggers
- ✓ Always-on VPS deployment
- ✓ Custom prompts + temperature tuning

Tip 3: Custom Skills

Build your own skills.
Package them. Share on ClawHub.
Turn your workflows into reusable tools.

```
$ openclaw skill create lead-qualifier  
> Skill template created  
> Edit: skills/lead-qualifier/index.js  
$ openclaw skill publish lead-qualifier  
Published to ClawHub! 🦁
```

The Big Picture

- OpenClaw is not a toy. It's infrastructure.
- Deploy it like you'd deploy any service.
- Specialize your agents. Automate your life.
- The developers who master this early win.

That's the Series!
