

Claude
skills.

Claude **skills are reusable capabilities for AI agents, easily installed with a single command. They bundle slash commands, agents, hooks, and **MCP** servers into shareable packages that work across **Claude Code, Cowork & Claude AI.****

SKILL

context7

DESCRIPTION

Context7 is an MCP server skill that pulls version-specific documentation directly from source repos into Claude's context. Instead of relying on outdated training data, Claude gets live, accurate API docs for any library you're working with.

MORE INFO

<https://github.com/upstash/context7>

github.com/upstash/context7

context7.com

14.05k

npm v2.1.3

MIT

Context7 MCP - Up-to-date Code Docs

Without Context7

- Code examples are outdated and based on year-old training data
- Hallucinated APIs that don't even exist
- Generic answers for old package versions

With Context7

Live, accurate API docs for any library

SKILL

ralph-loop

DESCRIPTION

Ralph Loop is an official Anthropic skill that turns Claude into a self-driving development agent. It implements a stop-hook pattern that enables long-running, multi-hour autonomous coding sessions by resetting Claude's context between tasks automatically.

Test Suite: passing MIT v0.11.5 556 passing

Ralph for Claude Code

Autonomous AI development loop with intelligent exit detection

What's Working Now

- Autonomous development loops with intelligent exit detection
- Dual-condition exit gate: Requires BOTH completion indicators
- Rate limiting with hourly reset (100 calls/hour)
- Circuit breaker with advanced error detection
- Session continuity with --resume flag

SKILL

frontend-design

DESCRIPTION

The most popular Claude skill with 96K+ installs. It transforms Claude's UI output from generic defaults into distinctive, production-grade interfaces with bold typography, unique color palettes, and creative layouts.

anthropics/claude-code/tree/main/plugins/frontend-design

README

Frontend Design Plugin

Generates distinctive, production-grade frontend interfaces.

What It Does

- Bold aesthetic choices
- Distinctive typography and color palettes
- High-impact animations and visual details
- Context-aware implementation

Usage

"Create a dashboard for a music streaming app"
