

Claude Code Can Now Build Its Own Skills

The new Skill Creator lets you create,
test, benchmark, and improve
Agent Skills without writing code

Consistent, Repeatable Output

Skills = Reusable muscle memory
that makes Claude Code smarter

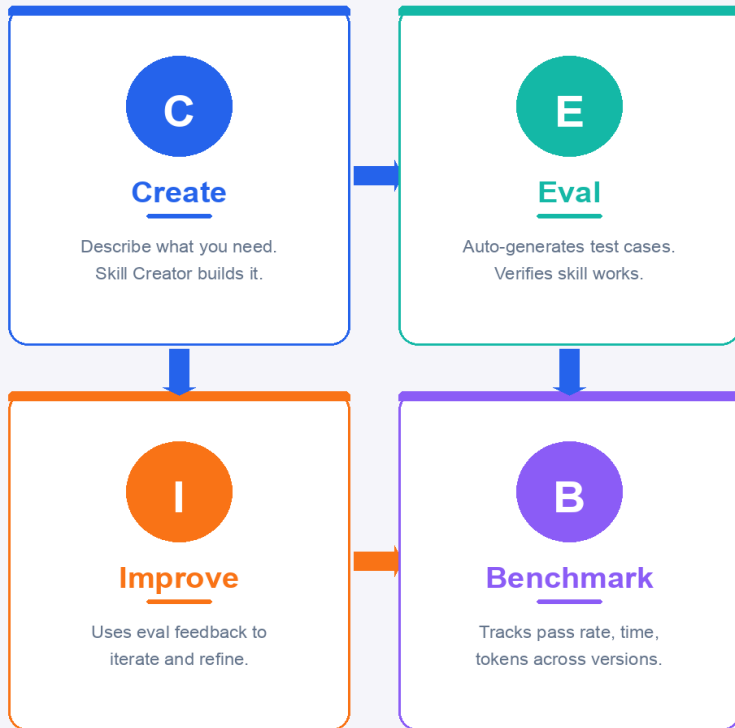

Teach it once. Use it forever.

BEFORE

- ✗ Write SKILL.md by hand
- ✗ Guess if the description triggers
- ✗ No way to test if it works
- ✗ No way to measure improvement
- ✗ Breaks silently after updates

VS**WITH SKILL CR.**

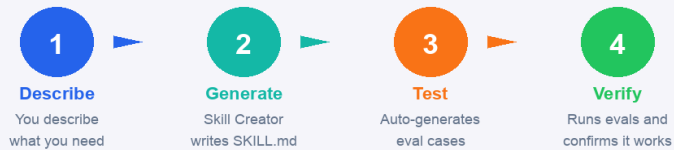

- ~ Describe what you want in English
- ~ Auto-optimized trigger descriptions
- ~ Evals verify every change
- ~ Benchmarks track pass rate + tokens
- ~ Re-run after model updates

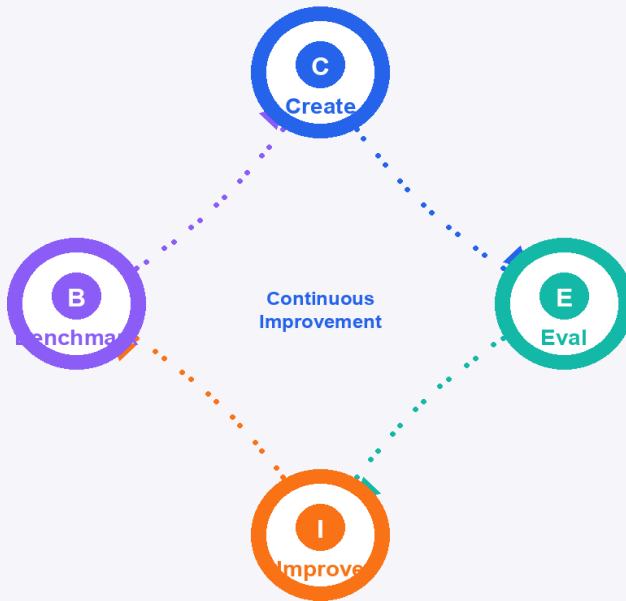

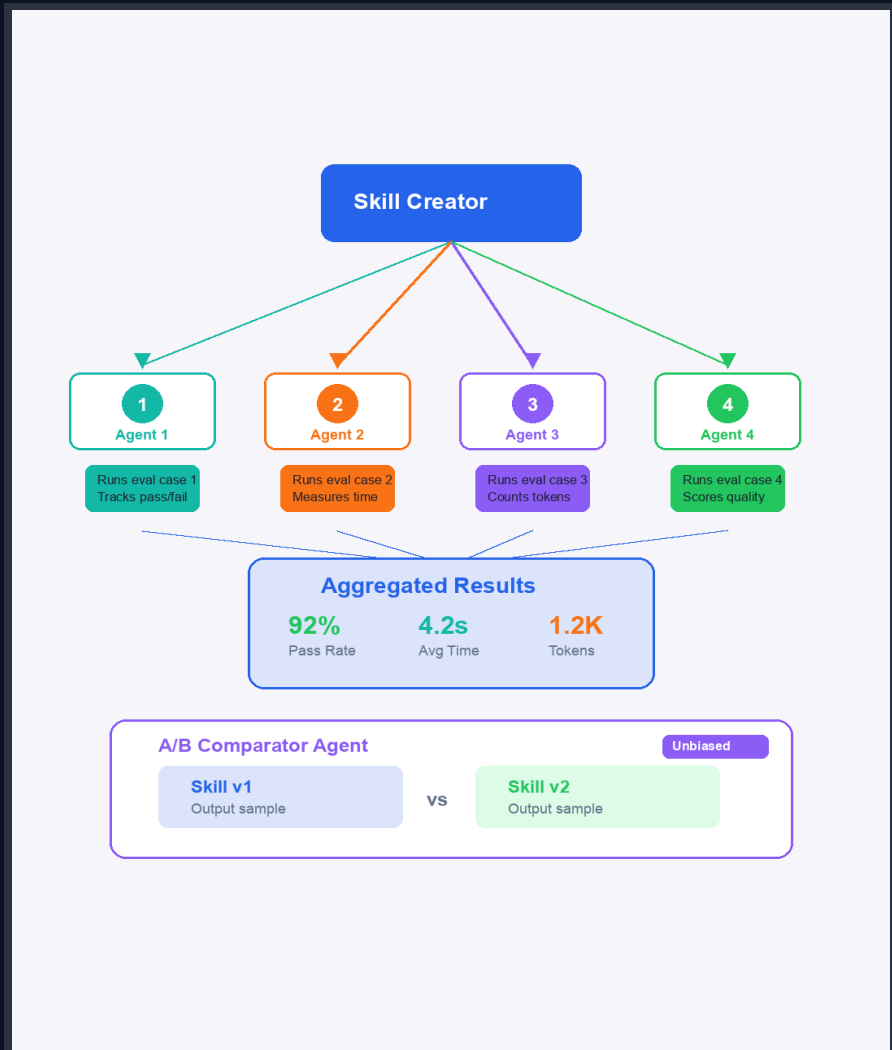

```
Claude Code

> Create a skill that reviews
Python code for security issues

Creating skill...
Writing SKILL.md
Generating 5 eval cases
Running evals...
5/5 passed >>
Skill ready! >>
```

S**Security
Reviewer**

Scans code for
OWASP vulnerabilities

A**API Doc
Generator**

Generates docs from
source code comments

C**Commit
Writer**

Follows your team's
convention automatically

T**Test
Generator**

Writes tests for
untested functions

P**Post
Writer**

Creates LinkedIn posts
in your voice

R**PR
Reviewer**

Reviews PRs with
your team's standards

How to Get Skill Creator

Option A: Extensions

Open Claude Code

Go to Extensions

Search 'skill-creator'

Click Install

Type /skill-creator

Option B: GitHub

Go to [github.com/](https://github.com/anthropics/skills)

[anthropics/skills](https://github.com/anthropics/skills)

Copy skill-creator/ folder

Paste into `.claude/skills/`

Type /skill-creator

Both paths give you the same skill. Pick whichever is faster.

“

The best AI tools don't just follow
instructions.

They learn to get better at following
them.

Skill Creator brings that loop to
Claude Code.
