

GPT Image 2 is here.

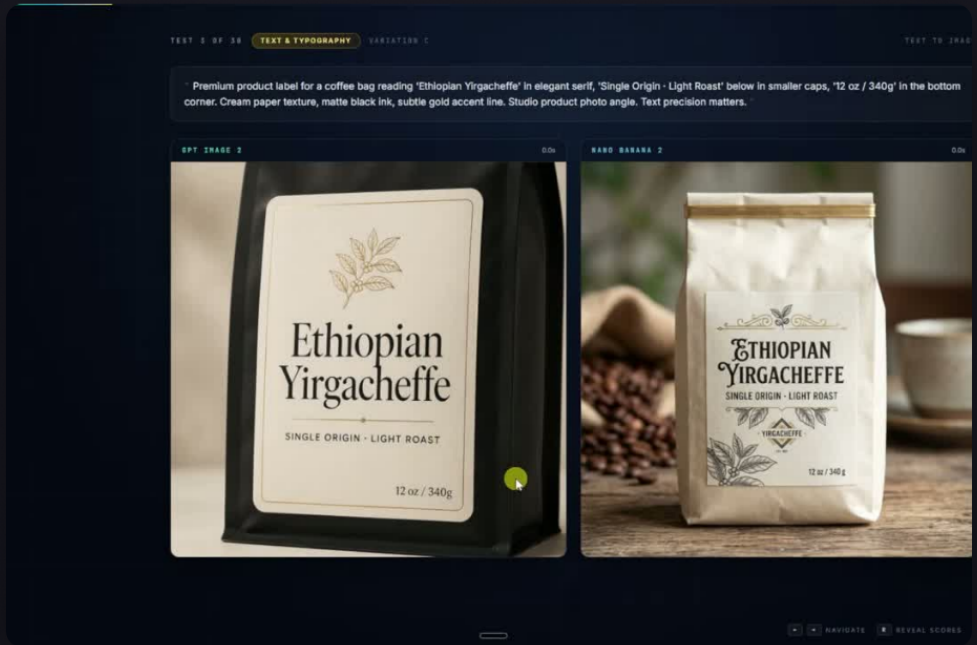

OpenAI just dropped a new image model. It went straight to **number one on arena.ai — beating Nano Banana 2 by the largest gap ever recorded on the leaderboard.**

The numbers

- +24 points over Nano Banana 2 on arena.ai
- Ranked #1 image-generation model, globally
- ~\$0.06 per image — commodity pricing
- State of the art for text, realism, and product photography

Text precision

Ethiopian Yirgacheffe — GPT Image 2 (left) vs Nano Banana 2 (right).
No misspellings, no fake ligatures.

Scan anything **clean**

BEFORE

- ✗ Crumpled handwritten page
- ✗ Creases and shadows
- ✗ Unreadable scans

AFTER

- ✓ Crisp digital scan
- ✓ Handwriting preserved
- ✓ Formulas intact

Virtual staging

Hand it an empty room. Keeps spatial awareness. Swaps the couch, rug, and mood without inventing walls that were never there.

15 / 18

Real estate virtual staging

v1 v2 v3

Localized creative

One prompt, every market. Product intact, layout intact, brand tone intact — across Arabic, Japanese, French.

07 / 18

Localized creative (multilingual)

12 ways to deploy it

- 01 Product packaging (cereal, pill bottles, labels)
- 02 Ad creative split tests
- 03 UGC selfie ads
- 04 Website and SaaS landing-page mockups
- 05 Book covers across styles
- 06 LinkedIn carousels end-to-end
- 07 Restaurant menus + food photography
- 08 Enterprise diagrams and flowcharts
- 09 Logo variants (3D, plush, glass, line)
- 10 App mockups and dashboards
- 11 Brand mascots across touchpoints
- 12 Real-estate virtual staging

How it was tested

- 30 head-to-head prompts
- Same inputs, both models
- Claude Opus 4.7 judged every round
- GPT Image 2 took the harder categories

```
$ run-matchup --model-a gpt-image-2 --  
model-b nano-banana-2  
> 30 prompts loaded  
> judge: claude-opus-4-7  
✓ text precision → gpt-image-2  
✓ product photography → gpt-image-2  
✓ complex scenes → gpt-image-2  
> character consistency → close tie
```

The barrier between "quick idea" and "pitch-ready visual" just got thinner. The shipping advantage now goes to whoever wires it into a workflow first.
